#### **DETAILED ACTION**

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 2617.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, 7-8, 11-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Chuah (US 2003/0214928 A1).

Regarding claims 1, 7-8, 11-12, Chuah teaches a method for supporting a data exchange between tenninal equipment and a mobile communication network via a mobile terminal, said terminal equipment and said mobile terminal being separate entities, said method comprising at said mobile terminal: receiving from said terminal equipment a request to establish a connection to said mobile communication network for exchanging data (e.g., connection request - see paragraph [0222]); forwarding said request to said mobile communication network (see paragraph [0222]); and in case a failure occurs concerning said requested connection and an indication of a cause of said failure is received from said mobile communication network,

Page 3

[0222]).

Regarding claim 2, Chuah teaches the method according to claim 1, wherein said failure is a failure resulting in a rejection of said request to said mobile communication network to establish a connection, said indication being an indication of a cause of said rejection (see paragraph [0222]).

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 4 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chuah in view of Rao et al. (US 2004/0076128 A1).

Regarding claims 4 and 9, Chuah teaches the claimed invention except presenting information to user of terminal equipment. However, the preceding limitation is taught in Rao et al. (see paragraphs [0027], [0031]). It would have been obvious to one having ordinary skill in the art at the time the invention was made to apply the teaching of Rao et al. to the teaching of Chuah to provide convenience to users.

6. Claims 5 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chuah.

Regarding claims 5 and 10, Chuah teaches the claimed invention except the step of storing the indication for further use. The examiner takes official notice that saving/storing information in mobile equipment for later use has been well known in the art. Thus it would have been obvious to one having ordinary skill in the art at the time the invention was made to store the indication for further use as is well known in the art.

Page 4

7. Claims 6 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chuah in view of Chou (U.S. Patent No. 5,850,526).

Regarding claim 6, Chuah teaches the claimed invention except the use of the data field of a link control packet. However, the preceding limitation is taught in Chou (see column 7, lines 11-15). It would have been obvious to one having ordinary skill in the art at the time the invention was made to apply the teaching of Chou to the teaching of Chuah to save and to use resources efficiently.

Claim 13 is the combination of claims 1 and 6. Thus, claim 13 is rejected with the same reason set forth in claims 1 and 6.

## Allowable Subject Matter

8. Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/645,866

Art Unit: 2617

#### Conclusion

Page 5

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Cave (US 6,631,269 B1) teaches signaling connection admission control in a wireless network.
- Acharya et al. (US 6,502,062) teaches system and method for scheduling data delivery using flow and stretch algorithms.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Huy D. Nguyen whose telephone number is 571-272-7845. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph H. Feild can be reached on 571-272-4090. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
